JOB OFFER

Automation Engineer

Annual salary between \$54 080 and \$91 520

You are an experienced and skilled Automation and OT (Operation Technology) Engineer willing to join a dynamic, devoted and motivated team in the fields of controls, industrial computing, new technologies and IT network for the renewable energy sector.

✓ About us

For over two decades, we have demonstrated an insatiable curiosity and desire to continuously improve. We are passionate about what we do, and we are determined to provide innovative and efficient solutions that exceed our clients' highest expectations.

Ganex invests in outstanding people of diverse background and talents and empowers them to achieve more than they could elsewhere. Our work combines advice with action and integrity that is why we are recognized as our clients trusted partner.

Ganex has activities all across Canada, has been doing projects in the US for the last 3 years and recently opened a new office in Illinois.

✓ Candidate profile

You will provide an optimal technical support and solution to our customers by designing, investigating, managing, communicating and resolving automated process problems. To ensure our organisation success, you will use your ability to organize and manage your time effectively. You will demonstrate initiative, self-reliance and strong communication skills.

✓ Your role

- Carry out SCADA and Automation projects at all stages (evaluation, development, installation, commissioning, maintenance and optimization);
- Oversee projects scope of work to ensure the solutions are adapted and respect the specifications;
- Produce or review drawings and documentation;
- Program and configure various data concentrators and protocol gateways;
- Provide internal or external training when required;
- Design complete systems, including power, interface and telecommunications;
- Occasionally support the Operation and Maintenance activities of our clients, especially with Tier 2 and 3 investigation and repair.

✔ What we are looking for

Must Have:

- Bachelor degree in electrical engineering with an automation profile or other related field;
- 2 years experience in a similar role;
- Knowledge of SCADA, HMI and industrial communication protocols;
- Have a PE license or in the process of having it;
- Valid driver license;
- Fluency in written and spoken English.

Nice to Have:

- Experience of ability in Project Management;
- Good knowledge of IT in general (database, security, network).

✔ What we offer

- A permanent and full-time position;
- A remuneration between \$54 080 and \$91 520, based on your experience;
- A medical, salary, disability, life insurance programs;
- Possibility to contribute to a Registered Retirement Savings Plan jointly with the employer.
